Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 13 October 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 13, 2009 has been entered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 11 to 29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

4. The amendment "C in solution is 0.0079 to 0.0415%" raises a new matter issue since there is no clear support in the original disclosure for this artificially created generic range. Applicants stated Fig.1 of the Declaration of Mr. Okuda submitted in Response dated September 14, 2009 shows that inventive C in solution is between about 0.0079% on the graph up to just in excess of 0.04 (specifically 0.0415%). This

statement is not accurate because graph indicates inventive steel contains C in solution at an amount  $< 0.03\%$  and going beyond  $0.03\%$  results in  $r$ -value  $\leq 1.0$ .

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 11 to 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent 2002-26941 (hereafter "JP-941") for the reasons set forth in the previous office actions.

***Response to Arguments***

7. Applicant's arguments filed October 13, 2009 have been fully considered but they are not persuasive.

8. To distinguish claims over JP-941, Applicant amended claims by incorporating C in solution at  $0.0079$  to  $0.0415\%$ . This range does not accurately define the invention for the reasons stated in prior paragraph No. 4. It is recommended to define C in solution by reciting the percentage of C in solution as -- C in solution is  $79$  to  $83\%$  of total C content ---. The support for limitation is established base on examples 17 and 18, and 35 shown in table 2-1 to 2-2. Examples 17 and 18 has a  $C_{fix} = 21\%$  and Example 35 has a  $C_{fix} = 17\%$  and as submitted by Applicants,  $C_{total} = C_{fix} + C_{sol}$  such that  $C_{sol}$  is  $79\%$  and  $83\%$ , respectively.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah Yee whose telephone number is 571-272-1253. The examiner can normally be reached on monday-friday 6:00 am-2:30 pm.
